SKILLS

Languages: Python | SQL | JavaScript | Java | HTML/CSS | NumPy | Pytorch | React.js | D3.js
Systems: Tableau | Git | Microsoft Excel | Microsoft PowerPoint | AWS | Salesforce | Jupyter | JIRA
Concepts: Data Analysis | Requirements Analysis | Human-Computer Interaction | NLP | Web Development

EDUCATION

NORTHEASTERN UNIVERSITY

Boston, MA

Bachelor of Science, Data Science | Minor, Mathematics and Spanish

2019– 2023

Honors: Dean's List | Honors College

Concentrations: Data & Social Justice | Statistics | Dataframe Manipulations | Data Visualization | CS Research

PROFESSIONAL EXPERIENCE

CAMBRIDGE COMMON RESTAURANT

Cambridge, MA

Office Administrative Coordinator

Jan 2024– Dec 2024

- Managed onboarding and documentation for a 50+ staff, improving record accuracy and access.
- Owned supply purchasing across 5+ vendors; optimized and reduced paper/packaging costs by 50%+.
- Resolved daily operational and compliance needs by coordinating owners, managers, and staff.

JOHN HANCOCK INSURANCE

Boston, MA

Distribution Data Analyst Co-op

Jun 2022– Dec 2022

- Analyzed distribution data using SQL to surface trends and drivers for leadership reporting.
- Built and improved Tableau/Salesforce dashboards (3 new, 10+ updated) for stakeholders.
- Defined KPIs with stakeholders and delivered reporting outputs that avoided any identifiable/PII data.

NORTHEASTERN UNIVERSITY

Boston, MA

Career TA and CoSMO Mentor

Oct 2020– May 2022

- Mentored over 40 students in resumes and interviews; utilized coworker collaboration to assist students.
- Developed and distributed 4 college-wide mock interview guides with research and attention to detail.

LIBERTY MUTUAL INSURANCE - SOLARIA LABS

Boston, MA

Data Science Co-op

Jun 2021– Jan 2022

- Presented information weekly on my performance improvements for a niche computer vision model.
- Worked in an Agile development environment to streamline internal Python tools for data pipelines.

PROJECTS

MONSTER SWAP

Feb 2025– current

Personal Project (JS, HTML/CSS, Next.js, React.js, Tailwind)

- Content managed over 2 years grew from powerpoint to party game to sticker to digital dress-up form.
- Designed a clean, intuitive web interface and dress-up game with usability across screen sizes.

ONCE UPON A VIS

Jan 2022– Jul 2022

Info Presentation and Visualization (Python, JS, HTML/CSS, NumPy, React.js)

- Transformed scraped metadata from 100+ books into qualitative advanced data analytics in Python.
- Headed project management for a 5-person team, arranging check-ins, collaboration, and merging code.
- Created intuitive data visualization to tell stories from literary data; focused on accessibility and UX.

RAIN PREDICTION MACHINE LEARNING

Sep 2022– Dec 2022

Machine Learning and Data Mining (Python, NumPy)

- Compared 4 classification models and tuning strategies; summarized tradeoffs and constraints.
- Maintained continuity for the team throughout cleaning, balancing, and running data over 10 years.

PAANIC!

Jan 2022– Jul 2022

NLP for Robotics, Research & RISE Presenter (Python, PyTorch)

- Developed and showcased creative problem solving, NLP instruction, and Robotic hazard tagging.
- Explored deep learning tasks with PyTorch and neural networks, using a BERT encoding layer.

CINEFILE

Jun 2022– Dec 2022

Database Design (SQL, Python, JS, React.js)

- Constructed backend database for movie ratings with SQL functions for front-end use with user roles.
